

Revation Enters OEM Agreement With Fiserv's Information Technology, Inc.

ITI to Integrate Revation's Secure Electronic Messaging Products with its Industry Leading Internet Banking Solutions

For Immediate Release

MINNEAPOLIS/EWORLDWIRE/Feb. 21, 2007 --- Revation Systems, Inc., an emerging leader in fully secure, encrypted electronic messaging technologies, today announced that Information Technology, Inc. (ITI), a unit of Fiserv, Inc. (NASDAQ: FISV), will integrate Revation's e-mail, chat and voice-over-IP (VoIP) products into its consumer and business Internet banking solutions, Premiercom and Premiercorp. Today's announcement builds on an 18-month relationship, under which ITI co-marketed Revation products into its base of financial institutions. Under the terms of the new agreement, ITI will further integrate Revation's secure encrypted e-mail, chat and VoIP technologies with its Internet banking solutions, and license modules to its clients.

"Offering this full suite of e-messaging and communication technologies greatly enhances the efforts of our client financial institutions to protect the sensitive information and communications of their Internet banking customers," said ITI Senior Vice President and eSolutions General Manager Jamie Deterding. "As a result, these products bring added value to our online solutions."

ITI's Premiercom and Premiercorp Internet banking solutions offer real-time access to account information, tight integration, feature functionality and advanced security. Plus, financial institutions have the choice of licensing these solutions in an in-house, outsourced or ASP environment, a range of options unique among Internet banking solutions.

"Organizations are using electronic communications as a primary means of sharing information - financial services firms in particular - and they're facing critical challenges in ensuring their security and authenticity," said Perry Price, CEO of Revation. "This new strategic relationship with ITI is a big step forward in our quest to efficiently distribute Revation's secure electronic messaging products to forward-thinking leaders in regulated industries."

Revation is a pioneer in developing fully secure electronic messaging applications that easily integrate with online banking, cash management, online banking systems and other financial applications. Revation's LinkLive products provide encrypted, fully-compliant and authenticated e-mail, chat, FTP and VoIP messaging applications to financial institutions. LinkLive is the only electronic messaging product suite fully integrated with ITI's Premier suite, so implementing these capabilities is fast and cost-effective for ITI customers.

About Information Technology, Inc.

Serving more U.S. banks and savings institutions than any other software and services vendor, ITI offers several core solutions, including the service oriented architecture-based Premier(R) and PCS Vision(TM) suites, and a broad range of supporting products and services available on the nation's most popular IBM and Unisys hardware platforms for in-house and outsourced account processing. Founded in 1976, ITI works closely with some of the best-known technology companies in the world, and it has grown to incorporate businesses and offices nationwide including its Premier, Precision Computer Systems (PCS), Branch Automation, eSolutions, Digital Solutions, Decision Metrics and Professional Services operating units. A subsidiary of Fiserv, Inc., ITI can be found on the Internet at '<http://www.itinw.net>'.

About Fiserv Inc.

Fiserv, Inc. (NASDAQ: FISV), a Fortune 500 company, provides information management systems and

services to the financial and insurance industries. Leading services include transaction processing, outsourcing, business process outsourcing (BPO), software and systems solutions. The company serves more than 17,000 clients worldwide and is the leading provider of core processing solutions for U.S. banks, credit unions and thrifts. Headquartered in Brookfield, Wis., Fiserv reported more than \$4.5 billion in total revenue for 2006. For more information, please visit 'http://www.fiserv.com'.

About Revation Systems, Inc.

Revation Systems ('http://www.ovation.com') develops electronic messaging application services, using its unique SAFEc architecture to create the first all-in-one system that provides secure, encrypted communications for all mediums, including live-chat, email, instant messaging (IM), IM hunt groups, real-time Voice over IP and video. The LinkLive Suite also integrates with telephony and back-office systems. Additionally, the company is the first to offer 'presence' capabilities, which alert customers real-time of service personnel's availability - important to marketing, sales and support center functions of customer contact centers. LinkLive products are compliant with GLBA, SEC, Sarbanes-Oxley and HIPAA requirements for logging, privacy and security.
